**From:** Marty MEISSNER  
**Sent:** Wednesday, May 02, 2007 9:56 PM  
**To:** DOSHCA\_Gibraltar  
**Subject:** please deny the proposed amendments to the Gibraltar Conservation Easement

Dear Director Slavin,

Attached is my letter objecting to the proposed amendments to the Gibraltar Conservation Easement. This letter, along with a binder of related documents, was hand delivered to your office today. I am also forwarding the documents which correspond to the first three tab sections of the binder as I discovered several errors after the binder was delivered. Please replace the corresponding documents with the revised attachments. My letter was also slightly modified and this updated electronic version should replace the hard copy.

If you have any questions I can be reached at . Thank you for allowing public comment on this issue which is so important to my community.

Marty Meissner

RECEIVED  
DELAWARE STATE HISTORIC  
PRESERVATION OFFICE

May 1, 2007

2007 MAY -2 PH 4:45

Director Timothy Slavin  
Delaware Division of Historic and Cultural Affairs  
21 The Green  
Dover, DE 19901

Dear Director Slavin:

I am writing to ask that you deny the proposed amendments to the existing conservation easement on the Gibraltar Estate in Wilmington. Attached to this letter is a binder containing a summary of my objections to the plan and many other related documents which corroborate those objections and question Preservation Delaware's hardship claim.

To this layman, it appears that your division of State government is standing at the top of a "slippery slope" should the Gibraltar easement be modified to suit PDI's wants and desires. After all, if the easement is broken to accommodate construction of an office building on protected open space, how can the State refuse similar future requests from others? How can any landowner trust the permanence of a conservation easement when considering how to best preserve their scenic and/or historic property for the enjoyment of future generations?

In 1997, Delaware's Open Space Council paid \$1 million to preserve the Gibraltar estate in its "scenic and open condition forever" so that it could be enjoyed by "this generation and generations to come" "in perpetuity". This action was taken after much convincing by elected officials and with the support of Highlands residents, many of whom sought to limit dense new home construction by preserving the estate as open space.

The public trusted PDI to preserve the estate while respecting the surrounding historic residential community. After a decade of lost opportunities and with the house in even worse shape than when the group took ownership, PDI now expects its Highlands neighbors to simply accept this radical, potentially community altering solution without question. I cannot help but see this as a betrayal of public trust.

I am baffled as to why Preservation Delaware, a group that presumably relies on the permanence of conservation easements to accomplish its mission, should expect to be given special treatment. If they cannot live within the restrictions of an easement, why should they expect others to? It is hard to imagine the group supporting such a request from a private citizen.

I urge you to uphold the original language and intent of the easement. I also encourage your office to conduct a thorough review of the property's condition and to question PDI's future relationship with the estate. Highlands homeowners who quietly work to preserve their individual pieces of Delaware's history deserve more than this group has delivered.

Thank you for your thoughtful consideration of this matter.

Sincerely,

Marty S. Meissner

Why the Gibraltar Conservation Easement Should NOT Be Amended

In February of 2006, I started hearing rumors that Preservation Delaware, Inc. (PDI) had plans to convert the Gibraltar estate to an office park including significant new construction, parking and a driveway at West 16<sup>th</sup> and Greenhill Avenue. This was confirmed soon after with a letter from Wendie Stabler (attorney for developer CCS Investors), an article in the Wilmington News Journal, and neighborhood meetings to review the plan.

Shocked is the best description for my reaction to the nature of the project and the amount of new construction planned for the site as I understood the estate was protected from new development. I could not understand how a commercial office park could now be built on a site zoned R-1, protected from development and surrounded by a residential community. Later investigation showed that the Delaware Open Space Council had paid \$1 million for the estate's development rights in 1997.

Discussions with neighbors indicated that others shared my concerns with the proposal's size, commercial nature and possible impact on our quality of life and home values. An ad hoc group organized a simple petition to gauge community opposition and quickly found many others who disliked the plan. The big question was how to prevent what we perceived to be a community tragedy. Over the last year, we've worked hard to understand the many issues in this complex situation.

This binder contains sections for several different subjects: the first few include a page describing why certain documents have been included and why I believe they should be taken into account as the State considers Preservations Delaware's restatement of the Gibraltar Conservation Easement.

Thank you for your thoughtful consideration in this matter.

Marty Meissner

**Notes on How the Petition Opposing the  
Gibraltar Office Park Proposal Was Conducted**  
**Marty Meissner**  
**April 30, 2007**

During the summer of 2006, an ad hoc group of neighbors opposed to the Gibraltar Office Park plan circulated a petition to gauge community sentiment toward the project. A copy of the petition follows. Relevant details of the petition drive are:

- Most signatures were collected in May and early June of 2006.
- Our canvass focused on the following areas (also collected signatures from other Highlands neighbors)
  - West 17th from Greenhill Ave. to Bancroft Parkway
  - West 16th from Greenhill Ave. to Bancroft Parkway
  - West 14th from Greenhill Ave. to Woodlawn Ave.
  - Riverview Ave. from PA Ave. to West 17<sup>th</sup> St.
  - Hamilton St. from 14th to 16th
  - Woodlawn Ave. from Pa Ave. to West 17th
  - Greenhill Ave. from PA Ave. to West 17th
- We collected 200 signatures. (Additional homeowners sent emails indicating their opposition, but were not counted in this total.);
- At some homes, more than one individual asked to sign and this was allowed. As a group comprised of mothers and others inexperienced in such matters, we assumed that every Highlands resident was entitled to let their voice be heard;
- We found residents overwhelmingly opposed to the office park plan – nearly everyone we approached was willing to sign;
- We simply did not get to each home, so one should not assume that the addresses without a signature support the project.

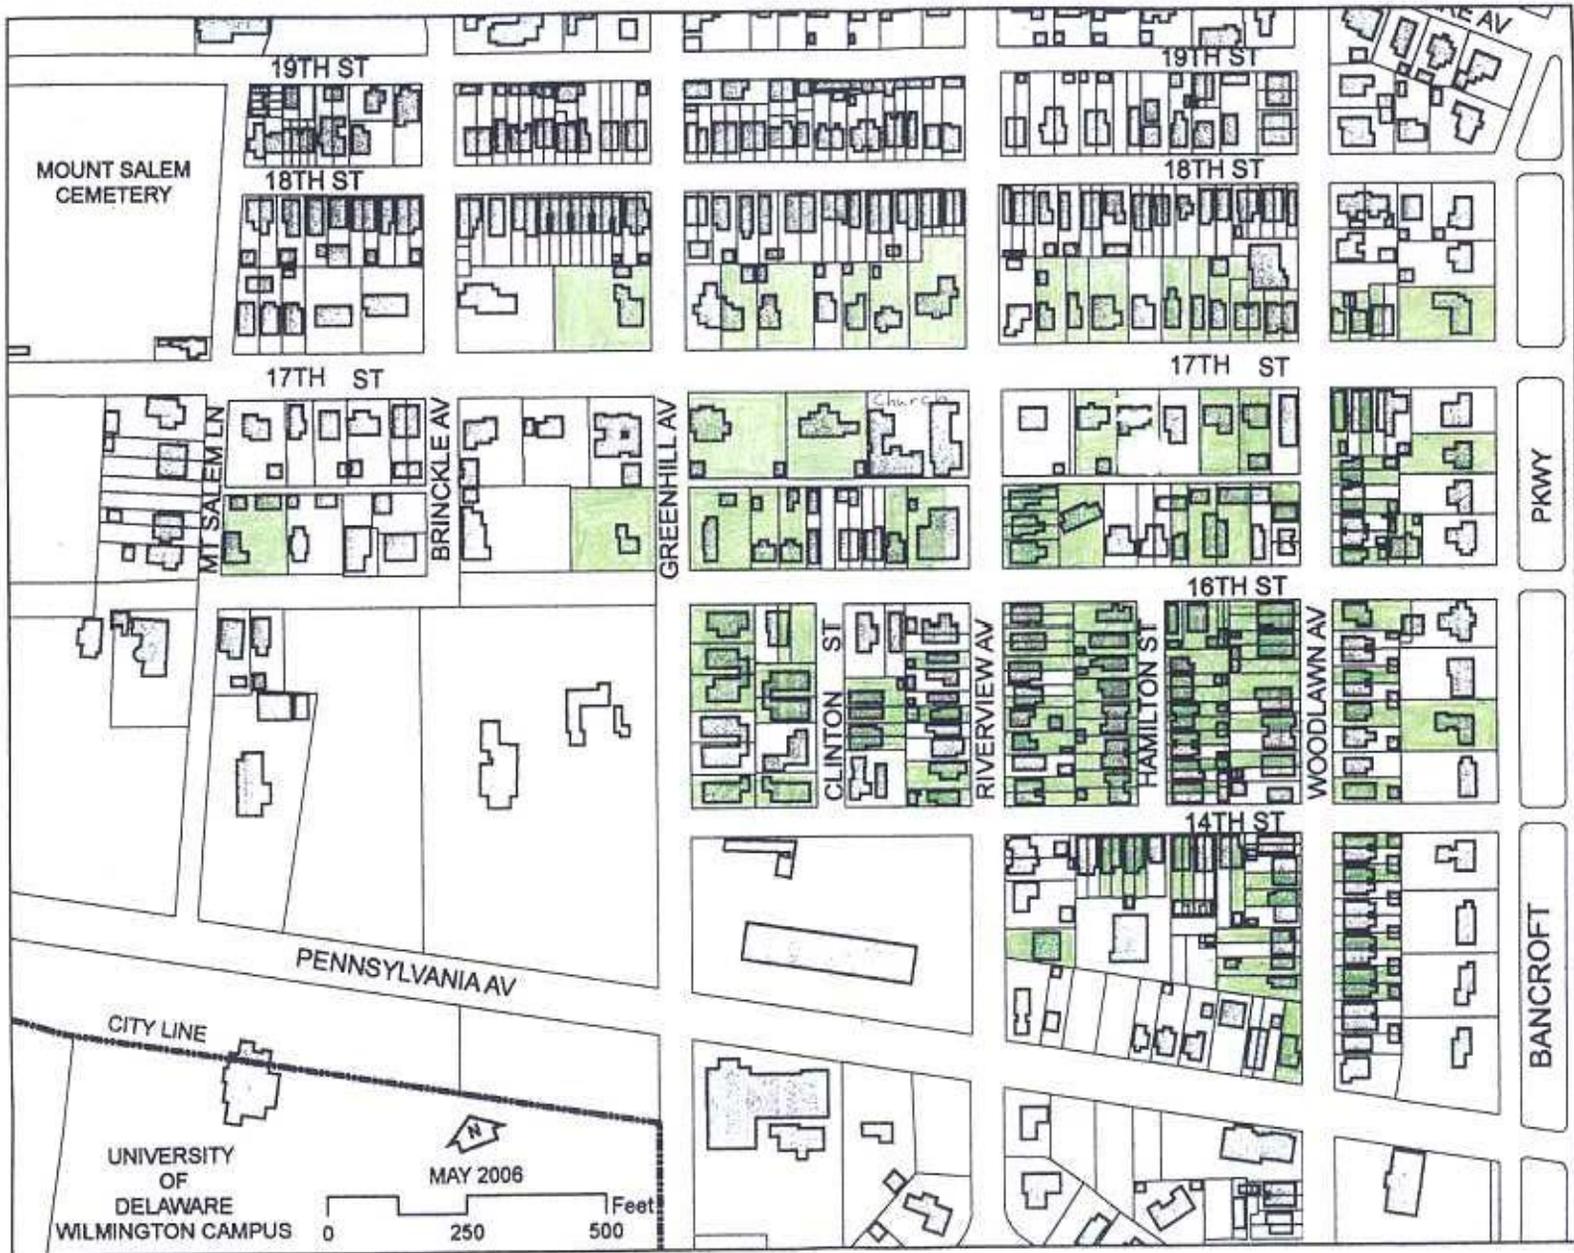

To provide a visual representation of the homes which signed the petition, a member of our group recently matched the signatures to the City tax parcel map. A copy is attached for your inspection. The tax parcel map is not 100% accurate, but our member tried to be as precise as possible. In short, this is a good faith effort to provide a visual approximation of the volume of residents who signed the petition against the Gibraltar office park plan. Lots shaded in green show homes where one or more residents signed.

Please note that this petition effort was essentially a snapshot in time as some individuals have moved since the petition was circulated.

The validity and relevance of our petition was challenged by the developer's attorney, Wendie Stabler back in August 2006. The petition (without the recently complete tax parcel map) was submitted to the Wilmington Zoning Board of Adjustment prior to their August 9, 2006 hearing on Gibraltar. Approximately 3 hours before that hearing, we received the enclosed letter and attachments from CCS Investors' attorney, Wendie Stabler, questioning the validity of the signatures and circulation method.

Needless to say, members of our group, conducting a grass-roots effort as fairly and honestly as possible, took exception to the tone and accusations contained in her letter. Ms. Stabler presented three emails as evidence of wrong doing. A quick bit of research revealed the following:

1. Mr. Jon Schmidt asked to have his name removed on June 7th, which was done promptly and politely. His email, the reply, the petition page he signed and the email sign-up list from the meeting are all attached. The petition and email sign-up list were the only materials presented at the time he signed the petition so the source of his confusion is unclear. Note that **NOTHING** says "Friends of Gibraltar" and we have never tried to be deceptive as to our intentions.
2. Mrs. Karen Healy's email to Mr. Drake Cattermole (CCS partner) was the first inkling of her wish to have her name removed from the petition. If she had simply asked, her name would have been crossed out promptly. Mr. John Kurtz is the group member who collected Mrs. Healy's signature and his response to her email to Mr. Cattermole is attached.
3. The third complaint seemed to imply signature forgery. Ms. Stabler attached an email from Mr. Jimmy Harty **III** saying he had never signed the petition. He was correct. The person who **DID** sign the petition was his father, Mr. Jim Harty **II**, who lived at the designated address. A simple phone call to Mr. Harty **III** quickly cleared up the matter. His email is attached.

### GIBRALTAR PROPERTY

We are residents in the vicinity of Gibraltar and are opposed to any rezoning or zoning variance that would permit commercial, office use development of the property. The Highlands neighborhood has been residential in character for years, and introduction of a commercial use there should not be allowed, with the changed character and traffic it would create.
